DETAILED ACTION

Response to Amendment

1. Applicant's amendment was received on 7/24/06 and has been entered and made of record. Currently, claims 1-7, 9-16, 18-25, and 27-36 are pending.

Response to Arguments

2. Applicant's arguments, see pages 12-17, filed 7/24/06, with respect to claims 1, 10, 19, 31, 33, and 35 have been fully considered and are persuasive. The rejection of claims 1-7, 9-16, 18-25, and 27-36 has been withdrawn.

Allowable Subject Matter

3. Claims 1-7, 9-16, 18-25, and 27-36 allowed.
4. The following is an examiner's statement of reasons for allowance:

The prior art of record does not disclose, teach, or suggest the claimed limitations of (in combination with all other limitations in the claims), generating a reference tone pattern and the tone adjusting patterns such that said reference pattern includes a central portion and reference sector portions arranged intermittently around said central portion, the tone adjusting patterns include adjusting sector portions

Art Unit: 2625

arranged intermittently around said central portion and each respectively located between two of the reference sector portions, whereby each of the adjusting sector portions has three sides respectively adjacent to said central portion and two reference sector portions, as set forth in claim(s) 1, 10, 19, 31, 33, and 35.

The closest prior art, previously noted as Watabe (JP 11-070701), discloses a selecting unit configured to select a dot size of a reference tone pattern and a generating unit configured to generate and output to a printer device said reference tone pattern having the dot size selected by said selecting unit and tone adjusting patterns having tones of a predetermined range including a reference tone of said reference tone pattern such that the printer device prints the reference tone pattern and the tone adjusting patterns on a recording medium for evaluation in the tone adjusting process. However, Watabe fails to disclose generating a reference tone pattern and the tone adjusting patterns such that said reference pattern includes a central portion and reference sector portions arranged intermittently around said central portion, the tone adjusting patterns include adjusting sector portions arranged intermittently around said central portion and each respectively located between two of the reference sector portions, whereby each of the adjusting sector portions has three sides respectively adjacent to said central portion and two reference sector portions.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
